INK TYPES

PLASTISOL

Its the standard ink your mom and dad are used to. You can feel it on the shirt and after 100 washes it starts to crack.

DISCHARGE

This kind of ink dyes your shirt... that way after you wash it the first time, you can't feel it. Kind of nice on those hot texas days.

FOIL

When you need to get your bling on! This is actually foil That sits on top of your shirt. It doesn't hold up well after several washes, but first impressions are all that count right?

We have the color chart for basic colors, but we can also mix any PMS color for a nominal fee
